

TUNNEL

VISION

YOUR BI-WEEKLY SOURCE ON THE RPI UNDERGROUND

We did it

By I

Very good to see you here! It's the anniversary issue of Tunnel Vision!!! We've timed this issue to be released on the exact anniversary! This issue's all about celebrating that, AND we've got more in here than ever before with the debut of another new writer, the return of Geologic Fever, and **3 special features!** Plus, many copies came with goodies like stickers! We're going all out on this super special edition of Tunnel Vision (hey, that rhymes!), and we hope you enjoy it!

SPECIAL FEATURES INCLUDE:

- Stoned Cat interview
- Jordan (GM Candidate) interview
- A Year In Review

**Tunnel Vision:
Out of the Tunnel**

Moo-re Water Fountains

By West Virginia

It's a bird! It's a plane! It's cow bones? The water fountain series continues as my search uncovers special secrets hidden in Sage labs...

...READ MORE ON PAGE 4!

**WE HAVE A
DISCORD SERVER!!**

What's new in the boxes

LOW is back up!

By I

I was pleasantly surprised when I checked on LOW on Tunnel Vision 15 distro day. The tech dump that was gone for about a month or more, LOW, got its own boxes back the day I released TVBW 15.

This time on WNITB, we've got another layout update, we're crowning the find of the YEAR, and Some issues come with a RAM stick, the same that came with TVW #1!

...READ MORE ON PAGE 3!

Subterranean Homesick Blues

PyPy- Pagan Day

By π

One day you will see that everything around you is π . The universe trends towards the circle, archimedes knew it, schrodinger knew it, so do you. The way you look through at the world is in no small part due to this beautiful ratio. The curve of a vinyl, the cells in your body, there is no world without π , there is no you without π . π is our savior and the secret to our happiness. Join me in our celebration with π , with its symbol eternally on your body you too can find salvation. You owe π your life, what is a loss of a little blood?

...read more on your path to irrational salvation on page 5

State of the Art

Tunnel art temporarily back!

Plus: Stoned Cat interview!!

By I

Starting last week, the JEC-DCC tunnel has come back to life!

At least temporarily. Jordan, a GM candidate, put up posters and markers in the tunnels for people to draw on! They were getting filled super quickly, it was beautiful! Read on to see some of that art, as well as some more typical wall art as well! Also, on page 9 is an interview with the elusive Stoned Cat!

Plus, some issues come with new stickers!

...READ MORE ON PAGE 3 AND 9!

Special Features

A Year in Review, Stoned Cat Interview, Jordan GM interview!

Never before has Tunnel Vision had so many specials! Since it's been a year, we're looking back at the past 15 issues in A Year in Review. Plus, Pi got in touch with Stoned Cat themselves and Jordan, the GM candidate who put markers in the tunnels!

As Seen On

A Year In Review

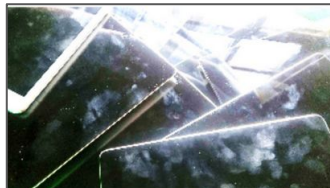

It's been quite the journey with Tunnel Vision so far, and it's been super fun! Let's have a look at some notable moments from the past year!

The first 2 copies of Tunnel Vision Weekly, placed in the DCC tech dump exactly one year ago today... Only 5 original copies were made!

Issue #3 saw photos sent from the RPI Furs of old art that has since been painted over. Our first special feature!

This was one of my favorite Tunnel Vision issues, the iPad issue! (#4). I still wonder why so many were in the VCC that day...

TVW #5, the last issue of Spring 2025, had the introduction of a camera in the JEC-DCC tunnel! It was only one camera, and gone by the start of Fall classes. No idea why this was installed, but machinery was being stored here over that summer, so that may be why.

TVW #7 was a rough one. *Black* spray paint on pretty much all tunnel art, and cameras were put up all over, which are still here today.. This issue had the last of the 'classic' tunnel art in SOTA.

TVW #4 also had the campus duck invasion! Starting (presumably) in the library, plastic ducks were distributed to folks, and for a day or so campus was covered with them!

Tunnel Vision #9 had the debut of Subterranean Homesick Blues (by Pi), and Geologic Fever (by S.S. Illite)!!

Tunnel Vision #10 was a celebration! Stickers for all, and a tech dump simulator on our website! Plus, our first crossword puzzle!

Our website was updated for TVW #13, thanks to JSL's help!

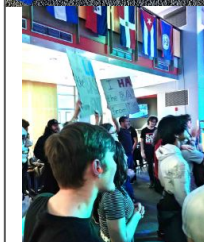

Around Halloween last year, a hot dog eating contest was planned and shut down. Hotdogs Against Humanity, a student opposition to the event, was also planned.

Over winter break this old house was demolished..

And finally, in TVW 15, wall art came back! What a year! Here's to another one!

11/07 had the official Battle of the Bands in the Union! Bands playing were *Super Critical*, *Gamma Radiation*, *Revitalizer*, *Guts*, *Entropy*, *Pseudosky*, and *Totally Confused*.

Find Of The Week

The find of the week this time is going to have to go to the microwave with pipes sticking out. Just imagine what it was used for!

The runner up was the plethora of VCRs in the DCC, along with the boatload of AV equipment, like picture-in-picture inserters and TV channel tuners. Super cool!

It's like they say, new year new me, only this time 'me' is What's new in the Box(es)! What do you guys think of the new layout?

This past year has been full of great finds, my personal favorite of course being Tunnel Vision (this is totally unbiased ofc). But more seriously, I think that **my pick for find of the YEAR** (from the finds of the week) had to have been... the boatload of tape media! The film reels were super cool to me and it was a very unexpected find. Not to mention the VHS tapes with old TV on them!

SOME COOL STUFF FROM THIS WEEK!

Microwave - now with *actual* viewing hole! You can drop food in from the top too!

If you were lucky, the DCC tech dump was your lecture location at some point since break!

It's like a museum piece... An ancient Wacom, yes Wacom digitizer in LOW! Still using serial...

(Left) This box had so many BNC I/O that you could make messages! Really hurts your fingers, though..

Plus! RAM is getting expensive. We're giving away some extras of the original DDR2 RAM sticks we gave away with the first issues! Find them stuck to select copies of TVBW.

JEC	DCC	LOW	Sage
The JEC has been full of printers, PC cases, and other stuff like that for a while now. At least that microwave was cool!	The best place to be most recently. Tons of AV equipment, at least 6 VCRs!	Literally the day of release LOW was back up. Some fans, TVs, a small-ish fume hood, and an old Wacom digitizer!	A big ol' printer. <u>Other places:</u> Pretty much nothing..

SOTA

T F H R

ANNIVERSARY EDITION

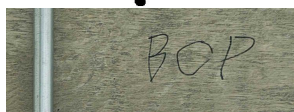

Welcome back to State of the Art! What do you think of the hand-drawn style? What a great past few weeks we've had. Tunnel art is back (temporarily), we've got a Stoned Cat interview, and more wall art for you all! The Starbucks notebook is back, too. Hope you all enjoy this anniversary edition of SOTA, we'll see you next time with more!

3.14

This is on a stairwell door. The stairwell door, in fact. Just like Hogwarts, this is the only door you can get into RPI from!

BREAKING NEWS: Stickman clinging on to dear life. Somebody help him before he falls!

H-How did you get up there?? This was on the ceiling, like 15 feet up!\

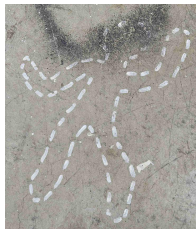

Hey, that looks awfully similar to the detailed eye in JROWL, before the cameras...

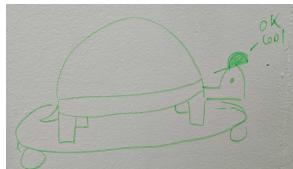

Camo, Stoned Cat, and the Eye, all in one!

Anyone up for some 3D chess?

This person couldn't handle the climb... RIP

ALERT: Rabid Turtle Terrorizes Skate Park

Pressure Gauge for Smiles :)

SPECIAL section: Tunnel art is back (temporarily)?!

Thanks to Jordan, a GM candidate, who put up campaign posters all over the JEC-DCC tunnel allowing people to draw on them!! Super cool to see some life down there again!

This one looks so good you could almost grab- Wait a minute..

That's one kool kat!

A very nice tree!

Watch out! Angry squirrel!

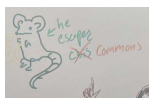

Puckman himself is allegedly voting for Jordan!

First pixel art I've seen in the tunnels! You should also play Celeste!

let's restore campus culture.

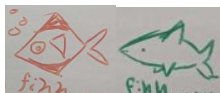

Amen to that!

Hey look, a school of fih(h)!

TUNNEL VISION: OUT OF THE TUNNEL

MOORE WATER FOUNTAINS

- By West Virginia

Hi all I'm back with more water fountain rankings. Today we're talking about Sage labs. Let's start with sage labs, quite a strange building. With classrooms that take up 2 stories, a house on the top floor, and a basement filled with student art, Sage labs is definitely one of the more interesting buildings on campus. In my analysis of the campus water fountains I've been exploring these buildings in much more depth than I ever have before. So as I go through and direct you to the best water fountain I'm also going to share some fun information about these buildings. Starting from the main floor which is technically the third floor, entering from the main entrance and heading to the left you'll find our first water fountain. Although it's not the coldest or most out of the way fountain, it has the best water bottle compatibility and is conveniently located on the main floor of Sage. It's the only fountain in the building with a filtered water bottle dispenser attachment. Now as we continue through this building you'll find that all the fountains are located in the same spot near the elevator bank on each floor. Much to the inconvenience of anyone in classrooms in the further back half of sage, those "annexed" classrooms, but I digress. While still on the first floor if you instead head all the way to the right, to the classroom at the end of the hall and keep to the leftmost wall of said classroom you'll find you're able to slip out of the windows and get onto the 2nd floor roof. It's also accessible from the boys bathroom on the 3rd floor.

Heading downstairs to the second floor you'll find a refreshingly cold fountain but limited water pressure makes it hard to fill certain bottles up. The first floor will not have any water for you but is home to a wide variety of sculptures and other art pieces made by RPI students.

Lets jump up to the fourth and fifth floors. Both are an older style of fountain, equally annoying to use when trying to fill up a bottle but the fourth floor does boast a bit more water pressure. Now if you are on the fifth floor and you manage to find the graduate student lounge, located in the "annexed" section, go to the end of the short hallway and on your left there'll be a kitchen / lounge room. If you're able to enter that room there's a door on your immediate left that leads to a classroom*. In that classroom you'll find a ladder that leads up to an attic that is home to some random artifacts, including but not limited to a whole bunch of rocks and a box marked *bones - cow?*, with what I could only assume were in fact the jaw bones of a cow. Sage is a wonderfully weird building and if I died in there and my soul was forever confined to its walls I would accept that fate graciously. Overall I'd recommend the second floor fountain. Generally speaking it's gonna be the easiest to access, especially if your class is located in those "annexed" classrooms and for me personally temperature is the most important factor and this water is cold and crisp. Till next time... stay thirsty ;)

* there is another entrance to this classroom but it's key card access only and is typically locked but it's right next to the hallway entrance to the graduate student lounge

Geologic Fever: The Return (soon)

S.S. Illite's running a little late, be sure to check our website for when their section's complete! It'll be in the archives.

Or wait until the second batch, probably tomorrow!

While we're here, check out the GM week events!

This year's theme is **Mystery Mayhem!**

You can check out all events on the official instagram, **@rpi_gmweek!**

Yesterday, the 23rd: Casino night!

Today, the 24th: Clues have been scattered across campus. The first 100 people to solve the mystery gets a free baseball cap! This starts in the Union, 6-9 PM.

Tomorrow, the 25th: No classes!! Free Lunch, Petting Zoo, Laser Tag, Inflatable obstacle course, Inflatable meltdown, Velcro Wall, Giant Twister, and more, according to the poster. Plus: Biggest Meme on Campus debates at 6 PM, followed by free pizza and the Final Debates!

Thursday, the 26th: Voting day! Be sure to get your mug by voting. I hope they still have free root beer!

Friday, the 27th: To end it all off, there's a free dinner where results will be announced, followed by a murder mystery with chances to win prizes!

This info was taken directly from the **@rpi_gmweek** instagram page, be sure to check it out!

Subterranean Homesick Blues

- π

Montreal's psych-punk supergroup PyPy's (pronounced π π) debut *Pagan Day* is like a fever dream laced with battery acid. It is a seven track odyssey filled with fuzzy riffs, primal howling, and psychedelic breakdowns that feel like a séances that is escaping through your drivers.

PyPy is comprised of Montréal's most unhinged pedigrees: Roy Vucino (guitar/vocals) of Red Mass and CPC Gangbangs infamy, Annie-Claude Deschênes (vocals) with Philippe Clement (bass) and Simon Besré (drums) from Duchess Says. Four members from four corners of Montréal's underground, converging on a sound that's irrational, transcendent, and—like the constant they're named after—never-ending and impossible to grasp.

The title track launches the record like a black mass at a house show. Vucino's guitar snarls through sheets of distortion while Deschênes's vocals rise like necromantic scripture over Besré's relentless kit work. Its foreboding tone perfectly sets the tone for a record that refuses to travel in a straight line.

"New York" launches forward with a Stranglers-inspired base line and a sense of sleaze that could strip the paint off a bathroom wall. But the real curveball comes with "Daffodils". Here the band slips into a gothy subdued groove. With strong disco-breaks and driving bassline, it slithers and hypnotizing you like digits spiraling out past the decimal with no end in sight

"Too Much Cocaine" is exactly what it sounds like: a sweaty, teeth-grinding ode to excess. The instruments grinding and lurching against one another in jittery, paranoid lockstep. And then "She's Gone" explodes like a bomb. It's blistering pop that descends into unhinged prog-shred excess, mangling every last drop of juice from a wah pedal until it begs for mercy.

The record closes with the sprawling "Ya Ya Ya / Psychedelic Overlords," a two-headed demon that allows the band to stretch into a full-on lysergic communion. Its riffs circle on and on, while the whole thing ascends into a punk-psych blur. A trance that drones to infinity.

Pagan Day is a simply excellent debut. It is a sweat-soaked, lo-fi invocation that proves the most dangerous sounds are the ones you can't quite compute. My advice is to just round up. You'll never get it exact anyway.

Extra: Excerpts from Stoned Cat interview!!

Since last time, pi got a hold of Stoned Cat, you know the one, for an exclusive interview! Below we've got the highlights!

What supplies do you use?

Xarpie

Why are you dashingy handsome?

What's the secret???

everyone knows.

Why do you Graffiti?

Becuz its fun and wrong!

What music have you been fucking with lately?

The sounds of the bugs and the grass

Tell me about the origins of Stoned Cat?

Once upon a time in a freshman dorm far far away... I was roaming in search of a place for my next hideout dehydrated, starving, and on the run I stumbled onto the \$#@%^ floor of %@@% Hall as I reached the top of the steps my nose led me to the smell of something familiar. I followed the trail to the room of \$@#-\$ then I knocked on the door when this chump opened the door I told him to stick em up and hand over the good stuff. We got to passing it around and long story short this guy was cooler than I thought its been kismet ever since then. I even left my tag on his whiteboard

Favorite place you Tagged?

Everywhere ive shat

How do you feel about the street art scene at RPI?

The eye guy is wack and lame hes a hack and a fraud LINES... MORE LINES. Shit just looks like a vagina (which im not opposed to but wheres the bush?) The RUN!runrunrunrun Guy in the tunnels was more interesting at least my heart raced a little. Somewhere above me and below camo.

But THIS is a trick question becuz the EYE isnt on the street haha is it anywhere anymore AAAAAANYWAY

Skreet art coo... I've only seen a few arts on the STREET (camo, dose,) everything else is writing on walls

How Stoned are you really?

Hahahahaha give me another interview I was too high to show up for this hahaha you have my managers email he got a secretary and she's typing all this as I speak with a foreign imported cerveja in my hand and my VR headset on. Will I need a lawyer for my public appearances?? Do you guys have a TV channel I can catch this on?? Can I Speak to I??? I want to be in the tunnel vision room with the bosses

Anything you want to share with the People Of The Tunnels?

POTT!!! LISTEN!!! I can't say much. Its my nature. Im a cat. There is always hope. You can ALWAYS kill your enemies. And trust me they are many and powerful. I am the god you worship.

Stoneylious B.(lazed) Cat.

Disclaimer: The views and opinions expressed in this interview are of Stoned Cat only and do not necessarily reflect the views and opinions of Tunnel Vision, its authors, or RPI.

Extra 2: Interview of Jordan, GM Candidate

Jordan, a candidate for the Union's next GM, and posterer of the JEC-DCC tunnels recently, agreed to an interview with us. Read what he's got to say below!

What are the core values you're going to be focused on as GM?

There's three core values that I intend on focusing on as GM. First of all, transparency. Students deserve to know what their government is actually doing and why. It's why I grew @rpistugov to 4 million views and shifted our focus to make 'brainrot content.' I wanted Student Government to be incredibly visible in the eyes of the students, and I hated the fact that our current marketing felt like advertising. Second of all is pride. I want students to be proud of this school, not in just what we are currently, but what we can be. RPI has 200 years of innovation behind it, an alum is about to command humanity's return to the Moon, we're responsible for so much technological innovation across America. We can have so many cool traditions, a strong culture of arts & music, more love for our community. We should take pride in that vision.

You've utilized Instagram reels and philanthropic actions during this campaign. What was your philosophy behind this have you seen any advantages from this approach?

The philosophy is pretty simple: meet students where they are. Most students aren't reading lengthy campaign platforms, or looking at every single poster. They're on their phones scrolling between classes. If I can't make my message work in that format, then I'm not communicating well enough.

The reels also serve a bigger point as a proof of concept for my intended goals. I'm running on a platform that includes building a student-led 'Rensselaer Media Coalition' to tell RPI's story to the world. The idea is to get students to create reels for channels like @rpiofficial and @rpialumni, while building up their own club social media presence. If I can't demonstrate that I know how to create content that people actually engage with, why would anyone trust me to build that out?

As for the philanthropic side (like through the tunnel art, or through the WD-40 chair stunt,) I'm doing it because I have the firm belief that if there's something I want at RPI, I should go out and make it happen. I'm trying to set an example that the administration's failure to fix the DCC chairs, or destruction of the tunnel as a living art project can't, and won't stop RPI students. We're more resilient than that, and by running for a high elected position while taking these risks (which may upset admin,) I think I'm setting up a good example for the rest of the student body. (also my chair squeaked during an exam once and everybody was staring at me...)

What's one thing you'd want to change or improve at this school, and what would your first steps be?

The disconnect between students and their own school. Right now most students experience RPI as a place you suffer through to get a degree and then leave. It feels like a transaction, not a core identity. I want students to feel like they're part of something they're genuinely proud of, and I want students to brag to their friends that they go to RPI.

First steps: within the fall semester, I'd hold the first semesterly Town Hall. Students, Senate, and administration in the McNeil room, with a 'State of the Union' address followed up by an

open-mic format with an audience questioning. Administrators and Senate would be held accountable, and take feedback directly from students. And I'd begin recruiting student creators from a variety of clubs (many of which have expressed interest to collaborate w/ StuGov already,) to launch the Rensselaer Media Coalition, so we start telling our own story instead of waiting for an administration PR office that hasn't gotten the job done.

Interview of Jordan, GM Candidate, cont'd

How would you communicate back to students what's actually happening in meetings with the administration?

I'd like to leverage the GM's power to email students more- I feel like it was severely underutilized for a majority of the semester and only really brought up in random scenarios like during the constitutional amendment. By leveraging things like the email, and also continuing social media engagement, I think it's possible to get a lot of people in the loop about what administration currently is doing. Furthermore, my plan to establish semesterly town halls heavily helps with this, where administrators not only are asked about what they're currently doing, but also can answer questions from students to clarify policy issues and campus wide changes.

How do you make sure you're representing the views of your peers and not just your own opinions?

I think that having good intentions alone isn't really ever enough for this. You can say you'd represent the views of students, but in reality, everyone has biases, even in Student Government. Our perspectives are different than those of someone in a fraternity or someone in athletics. We have to build better systems for direct outreach, and be proactive. Dormstorming was exactly this: we went directly into freshman dorms and asked students what they cared about instead of assuming we knew. The Town Halls I'm proposing are the same idea scaled up, a visible open-invite format. Through a highly publicized event, we can get more feedback and perspective than ever before by simply putting ourselves out there, and ingraining ourselves in Union culture. I also think the @rpistugov Instagram proved that when you take yourselves less seriously, students care more.

Anything else you want to say to the people of the underground?

The GM sets a focus and direction of the Senate, and meets with administrators, but ultimately it comes down to the committee chairs and senators directly to make our vision come true. That's where all of you come in. Within the first week, there are plenty of positions open for committee chair roles, where, if I'm elected, you can be a direct member of my cabinet.

I won't be looking for experience, or prior knowledge, but rather passion and willingness to learn. I began my journey in Student Government literally a month into my freshman year, with absolutely no idea what I was doing. But I cared enough, and a little more than a year later, I have the privilege to be running for this role. So please, apply to committee chair roles, and get involved. I'm running a campaign that will need a variety of passionate individuals who genuinely care about this school, and want it to be better.

Thank you!

RANDOM NEWS (HELL YEAH)

By I

Hey all! This is a bit of an impromptu section on some of the uncategorized news that happened recently that we haven't had the chance to write a section for. Have you been to the W2SZ Flea market on 3/21? Let us know if you got anything cool!

I made it, but by the time they got there people were already packing up pretty hard. Nonetheless, here's some photos from those events!

Soon afterwards was the Winter Carnival, in the same room! Plenty of clubs showed up and tabled. It was great! Did you know it was accepted students day on that day too?
