VISION

YOUR BI-WEEKLY SOURCE ON THE RPI UNDERGROUND

TVW Census!

By I

Crazy we're on the **Second-to-last issue before break!** What a week it's been, too! GM Week was a big one for both TVW and RPI. Thank you to all of you who joined the Discord server so far, it's been awesome being able to interact with you all! I've been wanting to get a general idea of how many readers we have, thus the TUNNEL VISION CENSUS has been created! It's a google form (see below), if you read Tunnel Vision or even skim it, I'd like to know! **Plus**, we have a few words about the **GM week debates**, in case you missed them as well as some photos from GM week. Hope you enjoy Tunnel Vision 17!

What's new in the boxes

The JEC tech dump... in 4D?

By I

Ever wanted to go tech dumping from **The comfort of your own home?** I recently got recommended a video on this new CGI technology, Gaussian Splats. They're a way to make real-time 3d renders of scenes which you can even view in a browser! They're pretty darn good if you get good photos, be sure to check out a scan of the JEC tech dump on our website! Plus, check out the finds of the week!

State of the Art

GM week Tunnel posters removed, plus Hopscotch?

By I

Nothing lasts forever. The posters that Jordan, the newly elected GM, put up around GM week this year have come down (for the most part). There is one poster from him left on the DCC side, he has stated that he is interested in putting up more, he just needs to make more. Hopefully soon they'll be up! Also in SOTA this issue are some events I wanted to highlight that either happened or will happen soon!

Subterranean Homesick Blues

Brian Eno- Before and After Science

By T

Under the influence of **filludion people walk the earth.** Little could they comprehend that "Time" is an illusion of perception. There is no "Before" there is no "After". Stop actualizing and live for all there is to live for **NOW!** Any more or less must be disregarded. Stop being spoon fed the sugar laced junk of chronologic. Embrace the present for its all we can and will know.

...every second is the first and the last, spend that infinitely valuable moment flipping to page 6 and read my review

From the desk

Lucky number seventeen

By carnivalesque

Seventeen is not just a lucky number, it's auspicious, blessed, serendipitous, fortunate, and sacred. (Thank you thesaurus.com!) How will 17 affect you today? (No, not the Kpop group.) And, a new crossword. (Insert parentheses for comedy rule of threes.)

Find Of The Week

The finds of the week this week are a set of smartphones, a Dell Inspiron Mini 10 in solid condition, and the case for an old credit card terminal in Cogswell! I feel like these were some pretty unique items you don't see often, so that's why I'm calling them the finds of the week!

Sometimes you get recommended a really cool thing on the internet and you just have to try it. The really cool thing that struck me recently was Gaussian splats. It was known about since the '90s, but was suuper well optimized recently (~2023/4) to the point that you can render full 3D scenes on your smartphone! If you were to try to do this a few years ago, it would have taken tens of gigs of RAM, but now it's actually pretty quick, and (in my opinion) really cool! If you go to our website, you can find a scan of the JEC tech dump we made using a service called vid2scan online. Check it out!

SOME COOL STUFF FROM THIS WEEK!

A never-before-seen view of the JEC tech dump, courtesy of splats!

Finds of the week this week!

I guess it was only a matter of time before the tech dump got paywalled. Damn you, EA! *shakes fist*

The helicopter that *almost* landed in the tech dumps!

JEC

Plenty more PCs, so many PCs. Plus a bunch of old laptops! Overall though, nothing spectacular but relatively active.

DCC

This time around was pretty uneventful. Seems like there may have been more film, though!

Cogswell

Quite surprising to see Cogswell getting some action, finds of the week this time!

LOW

Just a bunch of (taken apart) CD drives. Also only one box?

Post GM WEEK EDITION

Unfortunately, all good things must come to an end. Soon after GM elections, the posters in the JEC tunnels came down. Luckily though, Jordan, the newly elected GM, said he had plans to add more posters soon via a poster he left there. Plus, it appears the person who made the tour in #15 also put up posters. This edition has some more art from the posters that hasn't been covered previously, as well as other wall art. Enjoy!

Extra Happenings

There's so many cool things going on around now that I felt I had to include them here somehow! Here's some stuff to look forward to if you haven't see the posters:

The Touch Grass Music Festival

This Saturday the 11th, from 3-10:30 PM is the first ever Touch Grass Music Festival! There's a bunch of clubs involved, and it sounds like a lot of fun!

The 3rd Ever RPI Korok Hunt

The Korok hunt is back! The posters came up recently, and I for one have noticed the stickers in a bunch of places!

Artemis II Launch Watch Party

There were so many people watching in CII 3045 and the adjacent room that we were nearing the Schwarzschild radius for the rooms. Really cool event though!

UPAC Concert - The Living Tombstones

If you're a fan of The Living Tombstones, or are a fan of concerts, the concert's coming up on the 18th!

Would you like your event listed here?

Email us!

Hopscotch has invaded campus again! Legend has it if you don't hop the scotch you'll fail all your classes..

I SAW
THE LIGHT

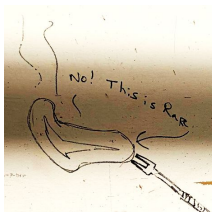

I TOO SAW THE LIGHT
(IT IS BELOW)

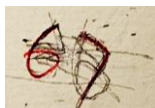

Okay, this isn't technically a wall drawing, but I figured I'd highlight the Artemis II launch watch party anyway!

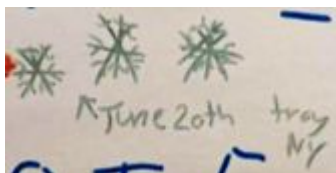

This looks more like sentient ice cream to me..

"No! This is rare"
Yeah, what'd you expect from a whiteboard-cooked steak?

A battle for the ages.
Will 67 or 66 win?

The first official forecast by tunnel art! (From GM Week tunnel poster)

Really detailed drawing that came up with Jordan's posters around GM week! They appear to be the same person who did the tour as featured in #15.

TUNNEL VISION: OUT OF THE TUNNEL

FOLSOM FUN!

- By West Virginia

The Richard Gilman Folsom Library was completed in 1976. Students and professors alike have strong opinions on this eye-catching building. I've never been a fan of brutalism, especially on an academic campus and I have directed many an insult at Folsom for that exact reason. But, over time, I've found that it's grown on me.

Across its 4 floors it houses over 400,000 physical volumes, over 200,000 electronic books, 66 private study rooms and an up-to-date archive of thousands of federal documents open to the public. Yet it only has 3 water fountains. Technically the first floor has the cafe so you could get water there, but as for water fountains specifically, there are none to be found. Let's work our way up starting at the basement level which is technically the first floor. This fountain is in the same location you'll find all of the Folsom fountains. It's to the left of the elevator, just around the corner from the doors. Starting off strong, the basement fountain is mildly cold and has enough pressure to fill most water bottles up, assuming you tilt it heavily. Jumping up to the third floor you'll find a much colder fountain with the trade-off being a weaker stream. Last but not least, the 4th floor water fountain has a stream almost identical to that of its basement level counterpart, however this particular water fountain has a special hidden feature. Its nozzle is loose, which allows the user to rotate it, so your bottle filling is not obstructed by the basin. I gotta say, it is very fun to fill your water bottle up this way, and it's almost enough to declare this the best fountain in Folsom, but unfortunately the fourth floor always has the warmest water in the whole building. That's why my pick is the third floor. Although it has the weakest stream, its icy temperatures make up for it, and combined with the orange carpets, the third floor experience is truly what makes it the best fountain in Folsom.

Richard G. Folsom and Carol Folsom (1976)

Subterranean Homesick Blues

-π

If there was any one person you could point to to resemble the near mythical status of diligence and ingenuity of a Mozart or Bach, it'd be Brian Eno. There's an iconic story about *Before and After Science*: It goes that Eno recorded nearly 100 tracks for it, then spent 2 years chipping and widdling them down to just ten pictures. Eno was fresh off of producing Bowie's seminal run of *Low* and *Heroes*, and had come away with a fetish for perfectionism. *Before and After Science* is the vindication for his efforts. The record (like its cover) is binary, as it is split neatly into two stylistic halves. Side A is unhinged, jingly, and rhythmic; Side B is moody, ambient, layered, and simply gorgeous. It's as if Eno couldn't decide which polarized character to choose: David Byrn's oddball mentor or postmodernist architect, so he simply did both.

Before and after Science.

The upbeat opening tracks are haunted with a gleeful paranoia. "No One Receiving" has Eno embody a Voyager-esque satellite, existentializing about its transmission of data just for it to fall on deaf ears. "Backwater" is a polished diamond of Art pop—it's catchy, kinetic, and has a chorus you'll find yourself humming when you're in the shower. "By this River" pivots the records tempo into a transcendental calm. Its gentle, clinically simple piano backdrops a stanza about stillness and the flow of time. It's delicate and ethereal like the subject it's reflecting on. "Through Hollow Lands" and "Spider and I" envelope you in textured electronic orchestration. These proto-ambient pieces swell with hymns and melodies, a sneak peak of where Eno would take us with his ambient series near the end of the 70s.

The liner notes read like a who's who of mid-seventies art-rock royalty: Phil Collins and Percy Jones from Brand X on the rhythmic tracks, Jaki Liebezeit of Can, Fred Frith on guitar, and Robert Fripp lurking somewhere in the background being Robert Fripp. What's remarkable is how all these avant garde idiosyncratic musicians serve the songs rather than splinter them. Eno has a gift for massaging virtuosos to play with restraint and evaporate the ego for the greater artistic tapestry.

This album would be the last of what would be his four "song" albums from the 70s, before his complete departure into the ambient and orchestral work that would come to define the later stage of his staggering career. In this context, this album feels like a swan song from one mode of creation, and an embracement of another. The title itself is an allusion to this threshold. While it may not be held to the same stature as his more iconic records, this stands to me to be his most complete. It takes elements of the paranoid energy from *Warm Jets*, couples it with the playful absurdism of *Tiger Mountain*, and finishes it with the sheen and refinement that you'd later find on *Music for Airports*. The album stands as a perfect balance of pioneering ideas from one of the great musical geniuses of our time.

FROM THE DESK OF CARNIVALESQUE

Welcome, dear reader, to an incredibly auspicious edition of TVbW. Across histories and cultures, the number 17 has been linked important dates, ages, and changing tides. Read more to explore to learn how you can activate the 17 in your life today...

In History

Draco, a constellation with 17 stars, is circumpolar from northern latitudes, meaning that it never sets and can be seen at any time of year. Find it between the Big and Little Dippers tonight!

Did you know that out of the 267 popes, 250 assumed the position on the 17th of the month. Leaving 17 not following tradition...

In Modern Culture

Did you know that if you ask ChatGPT how many letters are in 'Tunnel Vision' it'll say 17? Try it out today!

In a 2007 VTI study, participants were asked to pick a random number from 1-20. I guess that didn't choose randomly since 17 was the most common choice.

In Art

An artist's 17th piece is often their least popular work. Examples include van Gogh's *Brick on Stone on Flower* and Beethoven's *Für Gioachino*.

Poetic Haiku

With syllables seventeen

Luck number indeed

In Math

Seventeen is a prime number, a Leyland number ($x^y + y^x$) with 2 & 3, a Leyland number of a second kind ($x^y - y^x$) with 3 & 4, a Fermat number ($2^{2^n} + 1$), and one of six lucky numbers of Euler ($k^2 - k + n = \text{a prime \# for } 1 \leq k < n$).

★ ★ ★ ★ Horoscope for Thursday, April 9 ★ ★ ★ ★

Taurus, Leo, Pisces - Hydra is in your primary house tonight. Beware of two-facers and cut out problems at the source, lest they multiply.

Aries, Virgo, Aquarius - DO NOT GET THAT TATTOO. You know the one. I don't care how bad you want it. It WILL age poorly.

Libra, Sagittarius, Capricorn - Google 'war in Ba Sing Se'. The answer may surprise you. What else are they hiding from us?

Gemini, Cancer, Scorpio - Remember those beef shavings that have been sliding under your door at night? Remember that you're a vegetarian and you ain't scared of them.

GM Week 2026 Results

THE DEBATE

The GM debate on Wednesday was great. Most seats were taken, but still the vast majority of voters were definitely not there. I feel it was actually pretty useful in getting an informed vote ahead of the big day.

How would you be able to vote for a candidate if you didn't know their middle school binder color choices? The right answer was obviously black for Math, blue for English, green for Science, and red for Social Studies.

Other notable things were the UG President candidates collaborating instead of debating, the Jeopardy theme song ad libbed by some audience members, talking about zodiac signs, and picking favorites on the Eboard in front of everyone.

THE WINNERS

Who won? I'll tell you who won. We won. Everyone won in the end. We all won because we got Wednesday off (and had events and stuff). But also free root beer. I love root beer.

The winners of the elections were announced at the dinner on Friday. Unfortunately I was not there to see, but the results are in anyway!

In case you haven't heard, here are the results of the 2026 GM Week elections!

GM: Jordan Krishnayah

President of the Union: Kate Goldstein

Undergraduate President: Grace Meehan

What a GM week, fun as always! Hope you guys enjoyed it too!

P.S. If you have any photos you'd like to share of any of the GM week 2026 events, we'd love to feature them in a future issue!

A good ol' glass of root beer after voting.

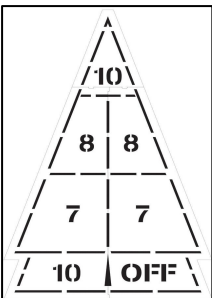

The actual debate!
