

TUNNEL**VISION****YOUR BI-WEEKLY SOURCE ON THE RPI UNDERGROUND****We wish you a Merry Christmas,
and a happy new website!****-By I-**

Well folks, we're in the home stretch. Last issue of the semester! Christmas is around the corner, I hope you're as excited as we are! After such a long semester, it's super exciting to be able to finally relax and not have to think about school.

A big development has come to us at Tunnel Vision in these past 2 weeks. Our website has been updated!! With some help from a fellow RPI student, going by JSL, we finally prettied up the website! It was super exciting to see it all come together, a semester in the making. Be sure to share with your friends! Missed a past issue this semester? You can finally read it! Merry Christmas!!

To wrap up this editor's note, I wanted to thank you all again for reading and all our writers again for writing this past semester, I hope you all enjoyed reading as much as we enjoyed writing! Good luck on finals, hope you enjoy this last issue of the semester, and we'll see you next semester!

What's new in the box(es)**DCC Tech Dump Photo Guide****-By I-**

Inside this fortnight's *What's new in the box(es)*, find a guide on getting to the DCC tech dump, with photos! Plus, find out THE find of the week! This time around we've had a week's break, which could mean both a lot of new stuff or a whole lot of nothing.. Find out by reading more on page 2!

State of the Art:**Snowy Edition****-By I-**

Nobody was ready for the snowstorm last week, it seems. The roads were all white and classes were 'not cancelled.' In this week's special state of the art, we'll have a look at some of the fun stuff people made with snow lately. There was some interesting stuff this time around, so be sure to have a look!

Tunnel Vision: Out of the Tunnel:**-by West Virginia**

Teed a drink? Join along as I, Judge, Jury, and Executioner begin my search to identify the best water fountain on campus

...Read more on Page 4 AND 5

Extra: Website Updated!**-By JSL/I?**

Every website goes through its growing pains. Ours happened to go through it for a while, but it's finally metamorphosized into a beautiful, sleek, and more user-friendly design! Plus, all issues are available digitally there from this past semester!

The old website though, for those of you who still want to use it, will be online for as long as neocities exists.

PLUS: ALL Current Issues can be seen on the website now!! View the PDF OR the specially web-formatted views of each and every issue!

Subterranean Homesick Blues**-By π**

Rarely do you feel like you have much control in your life. You drift in and out of consciousness while an endless sea of experiences and flashing lights go by. In decades future what will you remember about this point in the matrix formula we call life? I will remember my love of *The Epic* by Kamasi Washington

... Don't waste another precious moment on this ball of water and fire, read my review on Page 7

WHAT'S NEW IN THE BOX(ES):

DCC TECH DUMP PHOTO GUIDE

-by I

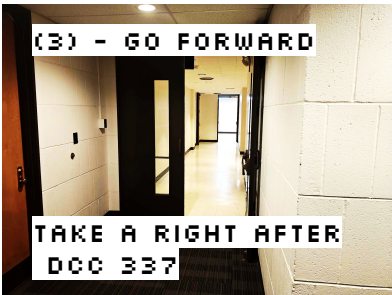

Ever wanted to watch a movie? The MRC has had you covered this past time. Overall there wasn't anything huge in the tech dumps, but a bunch of smaller, interesting finds are going to make up this fortnight's *What's New in the Box(es)*. The JEC had not a lot, and neither did LOW, but the VCC and MRC had quite a bit more going on. The DCC had almost nothing, buuut the find of the week is from here. So overall a rather uneventful few weeks considering the end of the semester is nigh, but you never know what could happen in the next few days! Be sure to check our NEW website for more up-to-date tech dump listings, tunnelvisionweekly.github.io!

FINDS OF THE WEEK: 1980S BARNES AND NOBLE BAG

The find of the week this issue came from the DCC, and it was almost the projectors in the MRC, but this one was just so unique that I had to include it. In the DCC one night, I walked in and found a bag full of MiniDV tapes. Upon further inspection, I found the bag design was copyright 1983, and upon even further inspection, I realized this bag was over 40 years old! It's crazy that a plastic shopping bag lasted this long, and I doubt there's going to be a find like this one again, which is why it's this issue's find of the week! See a picture on the left.

WHAT'S ACTUALLY NEW IN BOX(ES)

MRC	DCC
The MRC has actually been the most active tech dump this time around. Projectors, a microwave, a tool bag, a large-cased server PC, and more random interesting tech. Cool stuff!	The bottomless pile of film and video tape persists. More media was tossed in even, including the Barnes and Noble bag from the 1980s. Not much this time, but enough!
VCC	Other
Some kind of mainframe, bits of the Sun v210/v240 computer was seen (unsure which version, but the instructions were attached to a panel). Plus a lot of landline phone things, there's a landline there as of 12/09, even!	<u>Sage:</u> <u>Cogswell/LOW/JEC:</u> The JEC has had so many random, hard-to-get-use-out-of-any more items there just wasn't much to talk about. LOW had zero new stuff. Cogswell had one old lab equipment instrument in it, but that's it.

Here's the second edition of, "Where are the tech dumps, anyway?" - Photo edition! Here's the DCC tech dump. Following the images from 1-5 should get you to the DCC tech dump! Email us if you have issues finding it with our guide. Good luck!

A **cinematic** shot of the 5 Thinkpads seen before break!

"You're a wizard, Har-wait, you're not Harry, you're Barnes and Noble and this is 1983! Wait, didn't Harry Potter come out in the '90--" **disappears**

STATE OF THE ART - STARBUCKS EDITION: SNOWY EDITION

-By I

Did you see what was happening on the '86 field during the almost-snow-day? Igloos, walls, and snowmen dotted the field, and took up a lot of space. See some pictures around here!

In terms of tunnel art, there has been one development. In a tunnel we found a potential love relationship between Stoned Cat and the Camo tagger, with a heart between the two drawings. What could it mean??

Besides that, not much else to report on this issue, hope you enjoyed the snow last week, and hope you enjoy this issue's State of the Art!

A nice lil' snowman chilling on the '86 field (pun intended)

Here we have a rare photo of one of the tunnel artists, in this case Camo! Found on a lally chalkboard.

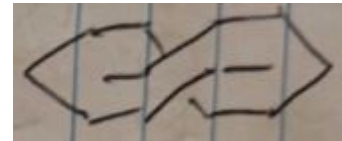

This is my personal favorite adopted tree this year, and yet it's still under construction!

Here's 2 more snowmen. On the left it's pretty much a bigger version of the top right snowman, with an interesting hill in the front. On the right it's a snowman with cucumber eyes!

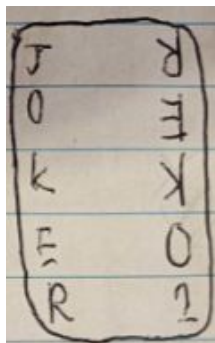

The beginnings of a huge igloo, or just a barricade. Cozy!

5

Manny strikes again!

Is that a Balatro reference?

Cavemen Set Up Camp on 86 Field

On Tuesday, Dec. 2nd, a big snowstorm hit RPI.

It was snowing so hard many were allegedly swept out of their dorms and into the snow.

The winds were actually so strong that some cavemen entrapped in ice at the North Pole were blown all the way to campus! They thawed out thanks to the warmth of the steam tunnels, and as they emerged into the world, they built an igloo on the '86 field, seen in the image above.

The cavemen spent at least one night inside, the next morning coming out, yelling 'Ooga Booga,' and being swept up by the wind again, to wherever it would take them next.

This feature doubles as a PSA, be wary of flying cavemen during the next snowstorm!

Got art you made or want to share? Unhappy with our coverage? Find something interesting we should report on here? Use the google form on the right (QR code) to submit art, comments, and/or news!

~~TUNNEL VISION: OUT OF THE TUNNEL~~

~~THE BEST WATER FOUNTAIN ON CAMPUS~~

~~BY WEST VIRGINIA~~

Okay so here's the deal. I drink water, you drink water. There are so many water fountains across campus but which is best? There are over 70 buildings located on Rensselaer Polytechnic Institute's Troy NY campus. From residence halls to the athletic facilities that's just too many buildings. I don't have access to a bunch of those buildings and neither do you - most likely. Maybe you do have access to those special buildings but guess what, I don't care because I don't have access and I'm the author. As the author I have decided that I will be limiting my scope to the academic campus this way most everyone reading this will be able to benefit from the findings. There are 23 buildings that make up the academics & research facilities here. I will be excluding certain buildings dedicated solely to research (lab buildings) or for graduate studies, and including certain buildings like the Union and Academy hall which are categorized as student life buildings. This leaves us with the following list of 15 buildings:

Amos Eaton
Carnegie
Center for Industrial Innovation, Low (CII)
Darrin Communications Center (DCC)
Jonsson Engineering Center
Folsom Library
Lally Hall
Pittsburg Building
Ricketts Building
Russell Sage Laboratory
Jonsson-Rowland Science Center (Jrowl)
Voorhees Computing Center (VCC)
Walker Laboratory
West Hall
Troy Building

TUNNEL VISION: OUT OF THE TUNNEL

(CONTINUED FROM PAGE 4) WATER FOUNTAIN RUBRIC

BY WEST VIRGINIA

	Outstanding	Good	Acceptable	Poor
Temperature	Noticeably very cold and refreshing	Moderately cold	Slightly cool but not enough to be refreshing, bordering on room temp	Room temp or warm
Water Pressure	Strong pressure, easy to drink or fill at	Adequate pressure, enough to fill at	Enough pressure to drink from but not to fill, requires bending down to reach the stream	Water dribbles out or doesn't allow for drinking in a sanitary way
Location	Located out of main traffic, easy to drink or fill without blocking hallways	Occasionally in the way but only if multiple people are lined up	Awkward placement, often causes traffic	Always in the way
Water bottle Compatibility	Fully bottle-compatible with a dedicated filler attachment	No dedicated filler, but any size bottle can be filled with the regular spout	Can fill a bottle at least 70% of the way up, bottle has to be held at a sharp angle	Cannot fill a water bottle
Flavor	No flavor, clean and neutral taste	Drinkable but a very slight flavor is noticeable to those with a sensitive palate	Flavor is objectively present, drinkability varies by individual	Ew.

SUBTERRANEAN HOMESICK BLUES

-π

Kamasi Washington's *The Epic* is not an album that is heard, its inhabited. At nearly three hours long, it moves with the gravity of something mythic, the kind of project that makes today's streaming optimized culture feel hollow by comparison. Calling it an album feels almost inadequate; *The Epic* is closer to a personal cosmology, a universe Kamasi meticulously crafted and now serves as its mystical sculler.

The first thing you notice is scale. Not in the bloated, "throw it at the wall and see what sticks" way that often sinks longer projects, but in a way that feels architectural. Washington writes like he's designing cathedrals out of sound with grand, towering pieces where every saxophone run, every choral swell, every subtle string flourish is another stained-glass window letting light in at a different angle.

Tracks like **"Change of the Guard"** explode with cinematic urgency, as if Washington is scoring the first moments of the universe itself. His sax tone is broad, warm, and it weeps and dreams along with us. It acts less like a solo instrument and more like a narrator. Meanwhile, the West Coast Get Down provides a rhythm section with an otherworldly force. Their playing is tight enough to be disciplined, while loose enough to feel alive.

But epic length means nothing without emotional architecture, and that's where Washington separates himself. Across the three discs, he swings between spiritual uplift and existential wandering without losing cohesion. **"Re Run Home"** recalls the neofunk energy of Herbie Hancock with the precision of Charles Mingus; **"The Magnificent Seven"** embodies the feeling of hopeful extensionalism, reminding us how small we really are. And then there's the choir, the album's secret weapon. They don't just complement the project they transcend. Their presence turns Washington's compositions into something liturgical, sonic scapes so remarkable they can bring life to the dead.

What makes *The Epic* land especially hard today, in a world of constant bombardment and stress, is how confidently it slows the world down. Washington rejects the idea that complexity is alienating. Instead, he makes it inviting. His jazz isn't homework. It's a gentle journey in a world of his making. You don't have to "understand" it in any academic sense; you just have to let its scale calibrate your sense of what modern music is allowed to be.

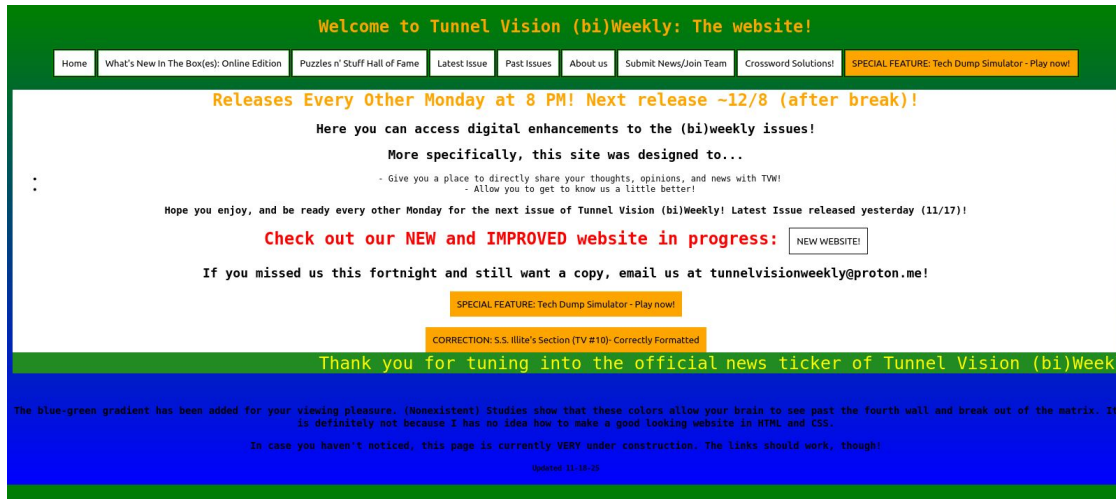

Yes, it's long. Yes, it demands patience. But the reward is rare: an album that expands and folds and grows in your mind for years. Nothing feels accidental, nothing feels disposable, and nothing feels small. *The Epic* reminds you that scale can be an artists greatest tool when it's backed by talent and intention and that sometimes the most radical thing an artist can do is refuse to shrink.

Extra: New Study finds Laser Website Surgery cures 100% of Ugly Websites

-By JSL/I

Websites. Many people have one. We do, too. Have you found your website suddenly looked like it aged 20 years? Has it started running slower than all the others? Does your website look blurrier than before? If you said yes to any of these questions, look no further, Laser Website Surgery can help!

Before Laser Website Surgery (meh)

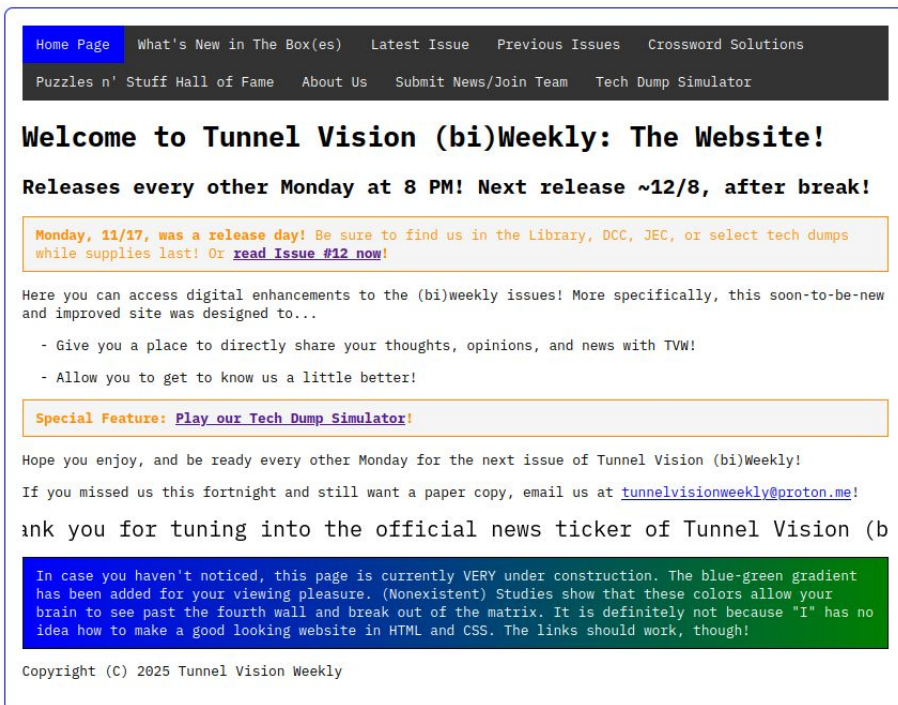

Thank you so much to JSL for all the help, it really couldn't have been done without their help.

Features of the new website include:

- All features of the past website
- DIGITAL copies of ALL past editions of Tunnel Vision INCLUDING a special HTML formatted version
- A shiny new UI
- sure to please all
- Plus, a **dark mode!**

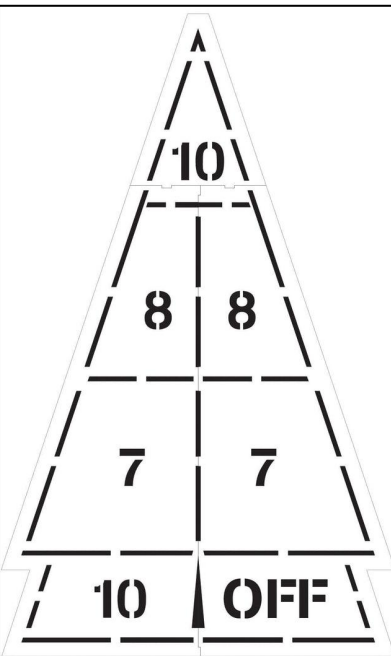

Hope you all have a great break, and be sure to check out our new website and share it around, we'll be updating it occasionally over break so stay tuned!

After Laser Website Surgery (wow!)

You can read all past issues *digitally* on our new website, tunnelvisionweekly.github.io now!

THE LAST PAGE: PUZZLES N' STUFF

Solutions to all puzzles on our website (eventually), tunnelvisionweekly.github.io!

Unscramble the words!

Ever played the NYT digits? This is pretty much that. Add, subtract, multiply, and divide the following numbers to get the target number. You can only use each number once, but if you first do $23+18$, you'll have 6, 1, 41, and 11 to choose from.

Your numbers:
6, 1, 23, 18, 11
Goal:
924

What other puzzles (n' stuff) would you like to see here? Submit your suggestions (or in some cases puzzles) to us using the QR code, email, or on our website!

Number nonogram #8!

Enjoy the classic game of newspaper shuffleboard above!

CONTEST BOX: We have a winner from last issue! They wanted to share a heartfelt message, "In loving memory of Mel' a dedicated RPI janitor whose quiet care supported our campus every day. Our community is grateful for his work and mourns his passing. Rest in peace." Thank you all for playing, and anonymous for winning! You are certifiably cool.

If you want to get a message and/or name in issue #14 AND the puzzles n' stuff hall of fame, email us a number from 1-10. The first correct guess wins! One guess per day per person, please.

Before we go, roll the credits:
-I, 'CEO' of Tunnel Vision Weekly
-West Virginia, Tunnel Vision: Out of the Tunnel writer
-π (Pi), Mediterranean Homesick Blues Writer
-JSL for website redesign
-Kris, K and π, Logo design (Kris) based on logo by K, based on logo by I, which was based on a logo by West Virginia
Thank you all for your help!

Disclaimer: The front page blurbs and internal sections are written by each respective author, and do not necessarily represent the opinions of Tunnel Vision.

...And that's all, folks! Thank you all so much for reading so far, I'm really glad you picked us to be your source for all news tech dump and RPI!

Be sure to check out our website, tunnelvisionweekly.github.io for more Tunnel Vision goodness, including an online tech dump listing, a FREE game, past issues and current issue supplements, and more!

We'll see you after Winter Break for issue #14! Good luck on finals!
